Dear Sir/Madam,

Subject: AAC Block Project registration for Carbon Credits (VCUs) by M/s. Bigbloc Building Elements Private Limited, a wholly owned subsidiary

Ref.: Announcement under Regulation 30 (3) of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015

We are excited to announce a significant milestone in our unwavering dedication to sustainability. M/s. Bigbloc Building Elements Private Limited (a wholly owned subsidiary of M/s. Bigbloc Construction Limited), a leading entity in the construction sector had registered its project for carbon credits under the Verified Carbon Standard (VCS) with the assigned project ID VCS 4911 for which VERRA has completed listing and under process of validation. This is a result of our dedicated efforts to reduce or eliminate greenhouse gas emissions associated with the production of Autoclaved Aerated Concrete (AAC) blocks.

At Bigbloc, we recognize the pivotal role businesses play in addressing climate change, and our company is steadfast in implementing practices that contribute to a more sustainable future. The carbon credits that may be issued through the VCS project, underscore our commitment to environmental responsibility.

The background of this achievement lies in our AAC block production process, known for its energy efficiency and reduced environmental impact. AAC blocks, being lightweight and possessing excellent thermal insulation properties, contribute to the reduction of greenhouse gas emissions. This aligns with global initiatives to mitigate climate change and underscores our dedication to environmentally conscious practices.

The Verified Carbon Standard is globally recognized for the validation and verification of carbon reduction projects. The specific focus on the greenhouse gas emissions associated with our AAC block production adds an extra layer of credibility to our sustainability initiatives.

NXTBLOC[®]
Autoclaved Aerated Concrete Blocks

The carbon credits that may be issued through the VCS project are a tangible representation of the positive environmental impact resulting from our AAC block manufacturing process. This achievement not only validates our commitment to sustainability but also contributes to global efforts to combat climate change.

As we look ahead, we remain committed to exploring innovative solutions and technologies that further minimize our carbon footprint. This milestone serves as a stepping stone for future initiatives aimed at creating a more sustainable and resilient built environment.

In addition to our commitment to register our project for carbon credit under the VCS, we are delighted to acknowledge the invaluable support and expertise provided by Surat-based entity, M/s. Climate Detox Private Limited (CDPL). As our consultant for this project, CDPL has played a crucial role in guiding us through the complexities of VCS compliance and ensuring that our sustainability initiatives are consistent with the highest standards. Their dedication to environmental stewardship and innovative approaches to carbon reduction have helped us achieve this remarkable milestone. We express our sincere gratitude to CDPL for our cooperation and partnership in advancing our shared vision of a more sustainable future.

We invite our stakeholders, partners, and community members to join us in celebrating this accomplishment. Your support is vital as we collectively work towards a greener and more sustainable future.

Kindly take the same on your record and acknowledge.

Thanking you.

Yours Faithfully,

For **BIGBLOC CONSTRUCTION LIMITED**,
